July 2012

## TESCOM CENTRALISED GAS SUPPLY SYSTEMS

A continuous and reliable Central Gas Supply is crucial in the Industrial and Laboratory environment, specially when a large variety of cylinder gases are required. Tescom's Cylinder Manifolds and Compact Panels in conjunction with point of Use Regulators provide all the functions required to set up a safe and reliable Central Gas supply.

Tescom Panels can come incorporated with a number of features such as Automatic Change Over, Low Pressure Alarm, Over Pressure Alarm, Emergency Shut-off etc.

Tescom has one of the most comprehensive ranges of Pressure Control Solutions which allow us to tackle almost any gas incorporating all necessary safety features to offer our customers a safe, reliable and High Purity Installation.

**Oil Safe**  
LUBRICATION SYSTEM

### OIL SAFE KEEPS CONTAMINATION HAZARDS TO A MINIMUM

It is always difficult to keep oil clean from contamination when you are operating in a remote hot and dusty environment and very often there are questionable storage practices involving drums of lubricants being stored in unsatisfactory conditions.

Oil Safe products take oil the guests work out of tube transfer. The storage and handling system comes complete with several sizes of white see-through drums and interchangeable lids, an assortment of spouts and flexible hoses plus a down-stroke discharge pump.

Lids and content labels are colour-coded to ensure the right lubricant goes into the right machine every time. When the lids handle is closed, the drum can be turned upside down without leaking. All Oil Safe products are manufactured from durable HDPE plastic and are rust proof, heat and chemical resistant with antistatic agents and are UV stabilised. They are lightweight and completely mobile.

News / Product Update

**Meech  
Shavotech**

915 / 976 EX Solutions

Meech is the only company to offer Ex-rated ionising bars with both close and long range capability. They do not require Air flow and are ideal for use in applications like solvent coating heads and gravure printing presses. Certified by Baseefa/Aftek for use in hazardous environment.

**New 983v2 Static Locator**

It is a lightweight pocket-sized device that provides an accurate measurement of static electrical charges over a wide range of voltages. With an integral distance meter, a clear indication of the correct operating range is given and this means that all readings will be both accurate and consistent.
